Florentin Smarandache's travels in images

2nd volume

Editor: prof. Dan Florin Lazăr

THE VOYAGER

via(tor) sine fine

An Introductory Note

The series of photoalbums THE VOYAGER summarizes in images Florentin Smarandache's voyages around the globe.

This second volume briefly depicts voyages in North America (Canada and United States of America, with a special emphasis on Gallup, NM, and surroundings, town that hosts the University of New Mexico, where Florentin Smarandache teaches Math for almost two decades), Asia (Taiwan - People's Republic of China), South America (Federative Republic of Brazil, Plurinational State of Bolivia, Republic of Ecuador, Republic of Chile), and Europe (England, Scotland, Kingdom of Spain, Kingdom of Belgium, France, Federal Republic of Germany, Kingdom of Sweden, Confédération Suisse, Hungary, Republic of Moldova, and Romania, with a special emphasis on the last, Florentin Smarandache's home country).

The photographies are arranged chronologically in subchapters, and date back as far as 1991; a legend indicating the month, year, and location is added to all photographies.

The scientist and writer Smarandache is, in his own words, an infinite traveler (*viator sine fine*) on a road to infinity (*via sine fine*).

Whoever is curious to draw his travels on the map, will discover that it is not long before the Math professor from University of New Mexico will exclaim, in Seneca's words: *nec sit terris ultima Thule* (nor shall Thule be the extremity of the world)!

Editor: prof. Dan Florin Lazăr

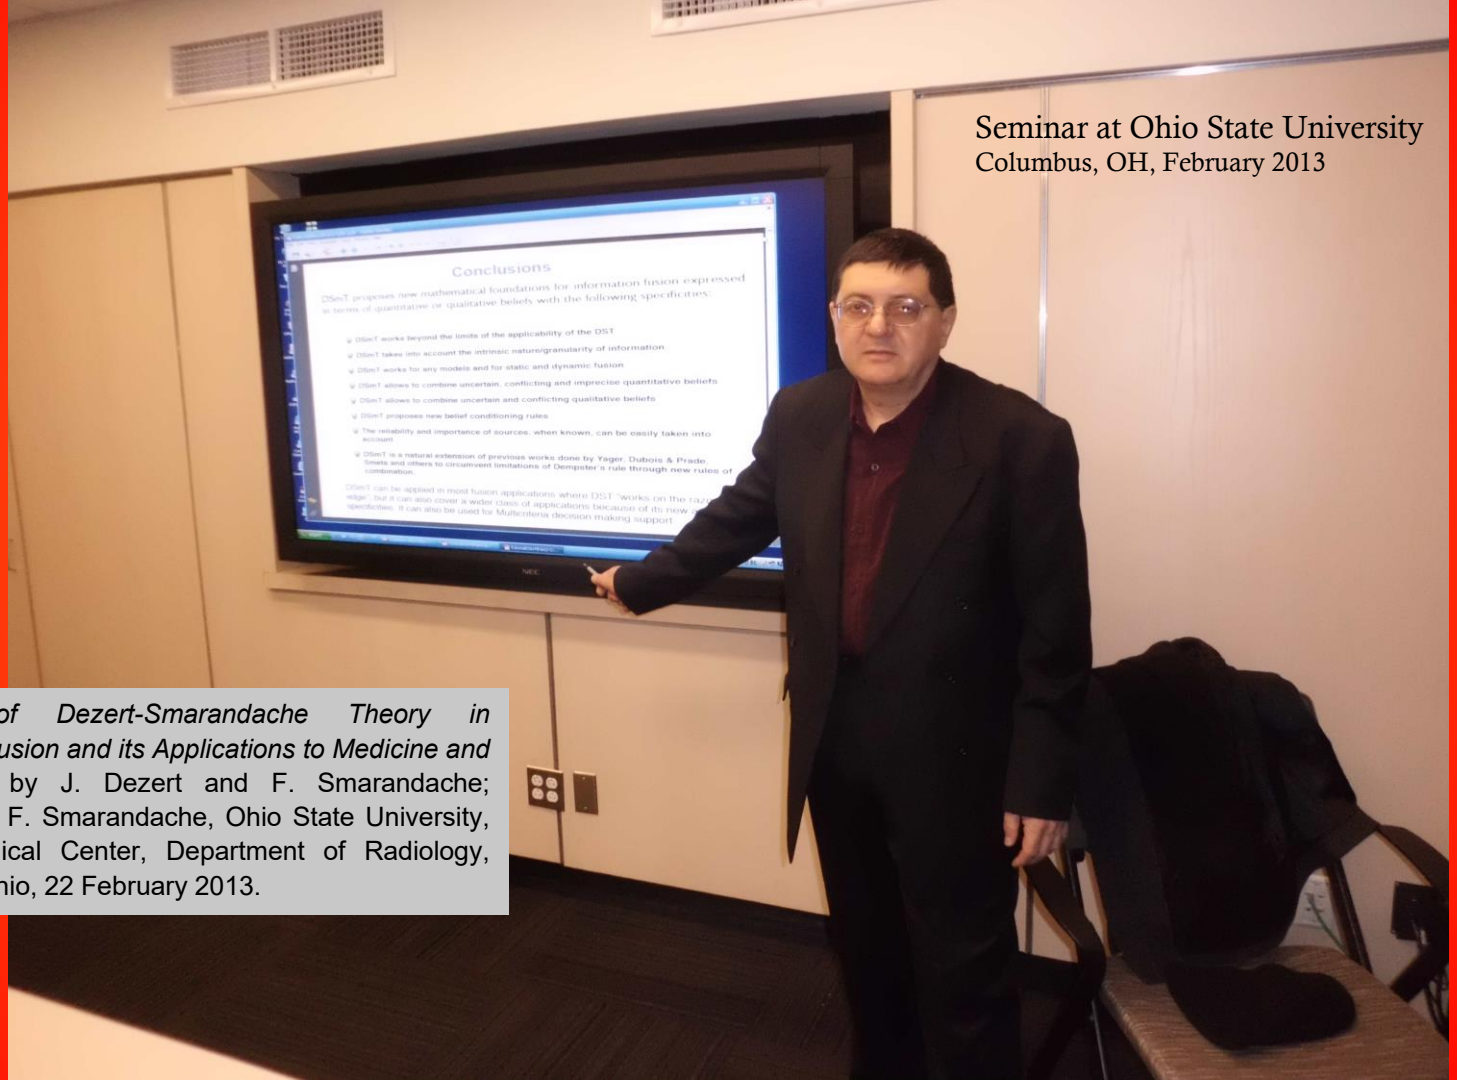
Electric Universe
2013 CONFERENCE THE TIPPING POINT
Friday, January 4, 2013
8:00 AM Welcome and Announcements by MC
8:10 AM Michael Clarage TB-Talk: Our Universe—It's Electric!
8:30 AM Wallace Thornhill: From Cosmic Currents to the Electric Sun
9:15 AM Paul Anderson: Electrical Discharge on Earth's Surface
9:55 AM Morning Break
10:10 AM Monty Childs: SAFIRE: An Experimental Investigation of the Electric Sun
10:55 AM James Sorensen TB-Talk: Halton Arp in Perspective: Was the Big Bang a Fizzle?
11:15 AM Stephen Crothers: The Non-existence of the Black Hole and the Failure of General Relativity
12:00 PM Lunch Break
1:30 PM Bob Johnson: The Nature of the Sun Revisited
2:15 PM Michael Steinbacher: A Large Plasma Vortex Discharge to the Colorado Plateau
2:45 PM Scott Wall TB-Talk: Predictions of an Electric Universe
3:05 PM Mel Acheson: Mathematical Metaphors
3:15 PM Afternoon Break
3:30 PM Ralph Biggins TB-Talk: Measuring the Cosmos
3:50 PM Tom Wilson TB-Talk: Believing is Not Seeing: A Belief Crisis in Modern Cosmology, Astrophysics and Planetary Science
4:10 PM Ron Hatch: Relativity in the Light of GPS
4:55 PM Forrest Bishop TB-Talk: Beyond the Tipping Point
5:15 PM Dinner Break
7:30 PM Private Scheduled Meetings

With Steve Crothers, attending the Electric Universe / The Tipping Point International Conference

Albuquerque Marriott Pyramid North Hotel, Albuquerque, NM, USA, January 4, 2013.

Seminar at Ohio State University
Columbus, OH,
February 2013

Columbus, OH, February 2013



Conclusions
DSmT proposes new mathematical foundations for information fusion expressed in terms of quantitative or qualitative beliefs with the following specificities:
DSmT works beyond the limits of the applicability of the DST
DSmT takes into account the intrinsic nature/granularity of information
DSmT works for any models and for static and dynamic fusion
DSmT allows to combine uncertain, conflicting and imprecise quantitative beliefs
DSmT allows to combine uncertain and conflicting qualitative beliefs
DSmT proposes new belief conditioning rules
The reliability and importance of sources, when known, can be easily taken into account
DSmT is a natural extension of previous works done by Yager, Dubois & Prade, Smets and others to circumvent limitations of Dempster's rule through new rules of combination.
DSmT can be applied in most fusion applications where DST "works on the razor edge", but it can also cover a wider class of applications because of its new specificities. It can also be used for Multicriteria decision making support.

The series of photoalbums THE VOYAGER summarizes in images Florentin Smarandache's voyages around the globe.

This second volume briefly depicts voyages in North America (Canada and United States of America, with a special emphasis on Gallup, NM, and surroundings, town that hosts the University of New Mexico, where Smarandache teaches Math for almost two decades), Asia (Taiwan - People's Republic of China), South America (Federative Republic of Brazil, Plurinational State of Bolivia, Republic of Ecuador, Republic of Chile), and Europe (England, Scotland, Kingdom of Spain, Kingdom of Belgium, France, Federal Republic of Germany, Kingdom of Sweden, Confédération Suisse, Hungary, Republic of Moldova, and Romania, with a special emphasis on the last, Smarandache's home country).

The photographies are arranged chronologically in subchapters, and date back as far as 1991; a legend indicating the month, year, and location is added to all photographies.

ISBN 978-1-59973-664-8
